AMALJITH PM

Fullstack Web Developer

3+ Years Experience in Dubai | React, TypeScript, Next.js, AI-Driven Web Engineering

IMMEDIATE JOINER

Dubai, UAE • +971 506565384 • amaljithpm1999@gmail.com • linkedin.com/in/amaljith-pm-45a5431b8/ • github.com/amaljith18

Senior Fullstack Web Developer with **3+** years of experience delivering scalable, high-traffic applications across enterprise projects such as **HRMS, Contract Management, and Help Desk systems**. Specializes in e-commerce performance, frontend architecture, and cross- functional delivery with experience integrating **Outlook Add-ins** with **React, Node.js, and SharePoint,** enabling seamless workflow automation and improved user productivity in modern applications., and user-facing intelligence into modern applications. Achievements include a **35% performance boost** in React.js platforms**, 6.5% conversion uplift** via A/B testing, and **50% faster** error detection and resolution through observability. Familiar with UAE tech ecosystem, product expectations, and performance-first culture.

TECHNICAL SKILLS

- **Frontend:** React, Next.js, TypeScript, JavaScript, Redux, Zustand, React Query, GraphQL, Tailwind, Material UI, Styled Components, Storybook, Design Systems, Micro-frontend Architecture
- **AI & LLM:** GitHub Copilot, Cursor, Claude Code,
- **Performance & Optimization:** Lighthouse Auditing, Core Web Vitals, Web Performance Budgeting, SSR/ISR, Caching Strategies, CDN Optimization (CloudFront), Bundle Analysis & Code Splitting
- **Testing & Quality:** Jest, Cypress, React Testing Library,
- **Backend & Infra:** Node.js, Express, MySQL, MongoDB, Redis, REST APIs, Serverless (AWS Lambda), Authentication/Authorization Flows
- **DevOps & Tooling:** CI/CD (GitHub Actions, GitLab CI), Docker, Azure DevOps (CI/CD Pipelines, Repos, Build & Release Management), Vercel, Sentry, Datadog, Git, Webpack, Monitoring & Observability
- **Soft Skills:** Technical Leadership, System Design, Cross-Functional Collaboration, Requirements Planning, Mentoring & Upskilling Engineering Teams

WORK EXPERIENCE

NOON -, Dubai • E-commerce Analyst *12/2025 – Present*

(Non-technical role – temporarily working while pursuing Fullstack/Web developer/ opportunities)

Freelance-, Dubai • Senior Frontend Engineer *03/2025 – Present*

Freelance Project – Tiffin Box Online Food Delivery Application

- Built a **modern, responsive subscription-based food delivery UI** using **React, TypeScript, and SCSS**, following **component-driven architecture**, improving **development scalability and UI consistency**.
- Developed **reusable and scalable React functional components** for **meal selection (Breakfast, Lunch, Dinner) and subscription plans (7-day, monthly, yearly)**.
- Implemented **Redux Toolkit for efficient global state management**, handling **user selections, subscription plans, pricing, and cart flow**, improving **state reliability and rendering performance**.
- Integrated **REST APIs** on the frontend to fetch **menus, plan details, and pricing** with proper **loading states and error handling**, reducing **frontend errors and improving user experience**.
- Applied **TypeScript interfaces and strict typing**, improving **code reliability and maintainability**.

Global Infonet Inc , Kochi, Kerala • Senior Software Engineer *04/2022 – 01/2025*

- Developed scalable and maintainable code, ensuring long-term stability of the software.
- Conducted weekly sprint reviews and demos with the client to ensure alignment, receive feedback, and iterate based on real-time insights.
- Embedded new technologies into existing systems, increasing capabilities and improving overall performance.
- Integrated third-party APIs to extend application functionalities and improve user experiences, leveraging external services for enhanced capabilities.
- Documented software development methodologies in technical manuals to be used by IT personnel in future projects.
- Mentored junior developers and conducted code reviews to enforce best practices, improve code quality

Global Infonet Inc , Kochi, Kerala • Associate Software Engineer *04/2021 – 08/2023*

- Developed well-organized training materials for end-users, enabling seamless adoption of new software features.
- Optimized application performance and code efficiency by applying lazy loading, code splitting, and API caching strategies, resulting in faster load times and improved Core Web Vitals.
- Configured RESTful APIs, GraphQL endpoints, and SharePoint API, MongoDB managing state with Redux Toolkit and Context API for efficient data handling and seamless user interactions.
- Collaborated with cross-functional teams to develop, test, and deploy quality software solutions for clients.

PROJECTS

Helpdesk System+Outlook-Add-in Integration -,

Technologies Used: React.js, Context API, SharePoint API, Tailwind CSS, SCSS, Azure DevOps, Git, GitHub

- Developed a modular, component-based front-end architecture in React.js, leveraging functional components and hooks (useState, useEffect, useContext) for efficient UI lifecycle management.
- Implemented Context API for scalable global state management handling user sessions, ticket filters, and real-time status synchronization.
- Integrated SharePoint API to manage service requests, attachments, and audit logs using list and document library operations with batch processing and query optimization to improve performance.
- Designed a responsive UI using Tailwind CSS and SCSS, enhancing accessibility and maintaining consistent visual standards across devices.
- Managed version control with Git/GitHub and implemented CI/CD pipelines in Azure DevOps for seamless team collaboration, code reviews, and automated deployments.

Project Management System -,

Technologies Used: React.js, Redux Toolkit, Material UI, Tailwind CSS, Axios, Azure DevOps, Git, GitHub

- Built a project management platform to efficiently handle company projects, client collaborations, and resource allocation.
- Implemented Redux Toolkit for scalable and predictable global state management, supporting complex data flows, user sessions, and real-time UI updates.
- Crafted responsive, modern interfaces using React.js, Material UI, and Tailwind CSS, enhancing usability and design consistency.
- Designed a responsive UI using Tailwind CSS and SCSS, enhancing accessibility and maintaining consistent visual standards across devices.
- Programmed Axios for secure and efficient communication with backend services through RESTful APIs.
- Managed version control using Git/GitHub and streamlined deployment pipelines with Azure DevOps to ensure clean code practices, continuous integration, and automated delivery.

EDUCATION

Diploma in Computer Engineering (AICTE) , Government Polytechnic College, Kozhikode, • KERALA, INDIA
2017 – 2020

PLUS TWO, Kerala DHSE • KERALA, INDIA
2015 – 2017
